EXPERIENCE

- **Work**
  - Associate Quality Assurance Engineer - Bayt.com / Talentera [NOVEMBER 2025 - JULY 2026]
    - Performed exploratory, functional, regression, and API testing for web-based recruitment and HR platforms.
    - Designed and executed detailed test cases and checklists based on functional requirements and acceptance criteria.
    - Identified, documented, and tracked software defects using Jira, providing clear reproduction steps, expected/actual results, and supporting evidence.
    - Developed and maintained end-to-end automated tests using Cypress with JavaScript custom commands to improve test maintainability and reduce test duplication.
    - Tested complex recruitment workflows including CV Search, User Management, Role Management, Requisitions, Hiring Approvals, Questionnaires, Agency Management, and Offer Letters.
    - Participated in release testing and supported QA activities throughout the software development lifecycle.
    - Collaborated with developers, product teams, and other QA engineers to investigate defects and ensure successful delivery of releases.
    - Worked on testing of mobile application on iOS and android , including notification, access control, and workflow-related features.
    - Used Git and CI/CD-related workflows as part of the automation testing process.

- **Internships**
  - Internship - MBAi Incubator [July 2024 - October 2024]
    - Completed a 3-month internship focused on Open Source software and Linux OS. Collaborated with teams to write documentation for Debian packages and improve the MBAi YU R&D center lab.

- **Hackathon Achievements**
  - First Place, Mälardalen University (MITC Hackathon), Sweden
    - Led my team to create a prototype for an industrial energy monitoring dashboard using Figma, securing the first place.
  - Participating in YU Innovation Center Hackathon, Jordan
    - Participated as a team member in the environmental Hackathon.

TECHNICAL PROJECTS

1. Graduation Project: Barber Booking App with Virtual Try-On (Style Cut)

- Developed a mobile application for efficient barber appointment management with a Firebase database.
- Included a dynamic PDF reporting tool for barbershops to list and manage their bookings.
- Integrated a Virtual Try-On feature using AI, allowing users to preview different hairstyles.
- Utilized the FlutterFlow environment and tools to create a visually appealing UI.

2. AI Bot for Google Chrome Dinosaur Game.

- Programmed an AI bot capable of playing the Chrome “No Internet dinosaur game“, demonstrating skills in computer vision and automation using (python, open cv, pytorch).

3. Number Recognition.

- Basic program for recognizing and interpreting handwritten numbers from images. This project was to learn skills in machine learning and image processing using Python, TensorFlow and OpenCV.

4.Course Project Human Centered Design (HCD).

- Collaborated with a multinational team to design a user-friendly social community application tailored to the needs of elderly users in Sweden.

5.Course Project in Smart digital platforms: cloud computing, security and big-data.

- Developed a dual-website application for sending and receiving IoT data. One site simulated an IoT device that sends data, while the other received, analyzed, and displayed the information for end-users.

EDUCATION

Graduate Bachelor of IT in Computer Information Systems (CIS)

- Yarmouk University, Irbid, Jordan [2021 - 2025] GPA: 86%
  - Bachelor in (C.I.S) Ranked #1 among Summer Semester Graduates
- Exchange Program in Sweden Mälardalen University (MDU): [January 2024 - June 2024]
  - Mälardalen University, Västerås, Sweden with the courses on (HCD),(Cloud Computing).

CERTIFICATIONS

Postman API Testing — Udemy

- API Testing, REST APIs, HTTP Methods, Authentication, Assertions & Test Automation

---

KEY SKILLS

Programming Languages:

- Cypress with JavaScript for test automation
- Python[Django, OpenCV, Pytorch, Numpy, PyTest, requests, BeautifulSoup]
- SQL and PL/SQL
- Visual C#
- C++ [basics]

Web Development:

- HTML
- CSS
- Javascript
- PHP

Other:

- Linux OS
- Windows OS
- MS office

Language:

- Arabic
- English
